given them up. Either we have to scrap them or sell off in public auction. Regarding the other 38 we have not made an estimate, because as and when these rollers are brought up, we will get estimates prepared and have them repaired.

Sri C. J. MUCKANNAPPA.—In addition to those 50 road rollers, may I know if an adequate number of road rollers are there for the length of road that is spread over throughout the State, national highways, state fund roads? How many additional rollers will the Government require?

Sri G. B. SHANKAR RAO.—At present we have got 489 rollers of various types in the State. I think the number of rollers we have, are just enough to meet the needs of the work on hand. This year, we have proposed to purchase about 60 rollers.
